Profile

I am a highly skilled professional with a Bachelor of Commerce in Data Science and Informatics, a Bachelor of Commerce in Financial Intelligence, and a Diploma in Computer Engineering. Currently, I am pursuing a Masters Degree in Information Systems Management. In addition, I hold several certifications in cybersecurity, machine learning, artificial intelligence, data mining, and web development. With more than eight (8) years of professional experience, I bring a unique blend of technical expertise and financial acumen to your team.

Education

Masters In Information Systems Management

Present

Midlands State University, Harare

- Advanced Databases
- Object Oriented Programming- Java
- E-Commerce Strategies
- Artificial Intelligence & Expert Systems
- Software Engineering
- Change Management
- Advanced Project Management
- Advanced Data Communication and Networking

Bachelor of Commerce Honors Degree in Data Science & Informatics

Aug 2021 - Jun 2024

MSU

- Software development with Python, Java, MySQL, PostgreSQL, PHP & C++.
- Artificial Intelligence: (Deep Learning and Machine learning)
- Cloud Computing.
- Database administration and design.
- Web Development
- Data Cleaning and Modelling
- Data Pipeline Architecture and Design
- Data Analytics, Visualization, Mining & Warehousing with R, Python, Power BI, Excel, and MATLAB.

Diploma in Computer Engineering & Structured Cabling

Jan 2019 - Mar 2021

MacMaine School of Computing

- Computer Repairs
- Structured Cabling (Networking)
- Data Recovery & System Diagnostics
- Wireless Networking
- Computer Security

Bachelor Of Commerce Honors Degree in Financial Intelligence

Aug 2013 - Jun 2017

Bindura University

- Accounting
- Economics
- Auditing
- Risk Management
- Business Intelligence
- Business Law
- Corporate Governance, Taxation, Public Finance

Data Analytics & Visualization

Employment

Data Analyst

Jul 2024 - Present

Walden Mining Company, Chegutu

- Manage, maintain, and continuously improve data tracking systems. Also ensure high data quality through rigorous data cleaning, validation, and accuracy checks.
- Build predictive models to forecast ore and sand quality, production output, and equipment performance.
- Prepare, review, and validate daily, weekly, and monthly production reports for management and senior stakeholders.
- Apply statistical and machine learning techniques to enhance operational efficiency and decision-making.
- Design interactive dashboards and visual reports to deliver real-time insights to key stakeholders: i.e., production trends, performance analysis, etc.
- Identify trends, inefficiencies, and process gaps, recommending actionable improvements across mining operations. Additionally, investigate data discrepancies, variances, and anomalies, and support corrective actions and root-cause analysis.
- Implement advanced data visualization techniques using tools such as Power BI, Excel, and MATLAB to communicate data trends to stakeholders.
- Develop and automate data validation protocols to detect and correct data anomalies in mining operations.
- Ensure the accuracy and timeliness of operational data by managing comprehensive data tracking systems and conducting root-cause analysis on data discrepancies to enhance data reliability.
- Apply machine learning techniques to optimize stockpile management, inventory forecasting, and operational efficiency.

Assistant IT Manager

Jan 2017 - Jun 2024

Chegutu Municipality

- Develop and implement IT policies, work plans, and training initiatives.
- Conduct routine system maintenance and regular data backups.
- Configure servers, email clients, and network infrastructure.
- Diagnose and resolve hardware, software, and connectivity issues.
- Repair and service computer hardware, including laptops, desktops, and printers.
- Serve as the primary point of contact for user technical support.
- Manage user access rights and security permissions across the network.
- Install, configure, and update operating systems and software applications.
- Upgrade computer hardware to meet operational requirements.
- Ensure optimal performance of all IT systems and network resources.
- Oversee website maintenance and integration of emerging technologies.
- Establish reliable procedures for data backup, recovery, and protection

Acting Public Relations and Communication Manager

Apr 2023 - Jun 2024

Chegutu Municipality

- Speaking on behalf of the council and CEO, additionally ensuring effective internal and external communication.
- Stakeholder engagement through the website and other council platforms.
- Oversee Council events media coverage
- Responsible for management and updating of the council website.

Cyber Security: White-Hat Ethical Hacking

Practical Machine Learning with Python

Data Mining with Python

PROMUN ERP System

Managerial Experience

Assistant IT Manager

2017 - 2024

Acting Public Relations and Communication
Manager

Apr 2023 - Jun 2024

Data Analyst at Walden Mine

Jul 2024 - Present

Major Projects Executed

Modern AI Powered Website

2016

Designed and develop a modern, AI-powered website for Chegutu Municipality, integrating features such as intelligent live chat support and a dynamic ratepayer enquiry system to enhance user engagement and service delivery

URL: <https://www.chegutumunicipality.co.zw>

**Chegutu Municipality Property Survey App
Development**

2020

Developed data collection application and supervised data capturing

- Developed and configured a scalable data collection application for the survey project using modern technologies, seamlessly integrating it with KoboToolbox for real-time, cloud-based data capture and analysis.
- Lead the entire project lifecycle—from strategic planning and system design to development, testing, and successful deployment—ensuring efficiency, reliability, and user accessibility.
